

# Dependable Power

With a Type "M" Coal Oil Burning Engine you are sure of power when you need it. A Windmill gives power only when the wind blows; and you have no doubt noticed that during the dry hot weather there is often no wind. Then is when you need the water most. Type "M" Engines cost about one-half the price of a windmill. They are much cheaper to operate than a Gasoline Engine. Call and let us figure you a water system for your farm.

### MORTALITY RATE LOW IN DISTRICT

Dr. M. R. Trumbower, local registrar, reports that there had not been a death in the district for six weeks before the death of the infant child of Mr. and Mrs. Chas. J. Brammer, Monday.

This is a splendid record in the face of the prolonged dry weather which usually results in more or less attacks of fever or malaria. So far as known there is not a case of typhoid fever in town and only a little malaria contracted by members of camping parties.

Improved sanitary conditions and pure water are responsible for the healthful condition of the town.
